Artwork: [David Collado](#)

Photography: [Remoto](#)

We are living through hard months, months in which the economic news are punishing the people's spirits. The music is always a way out, a mechanism of escape for the mind. In **Cicuta Netlabel** we realize this, so we bring you a monthly six tracks to make you have a good time.

We open the EP with the Portuguese *Wire Tap* and *Stig*, better known on the international scene as **Quantic Spectroscopy**. Their dark and forceful style has dazzled many of the labels more active in international techno scene as *TMM Records*, *Heaven To Hell* and *Shout Records*. His latest project has been creating his own label, *Reaktivare*, with which just released the first reference.

Continue with Irish **Adam Kelly**, an artist who after going through labels like *Labrynth*, *Induxtriall* or *NewRythmic* comes to *Cicuta* to offer us fresh techno, moved, very classy.

The next artist that we present is **Hadji**, young Croatian who has been linked to music since childhood, and that over the years has come to the dark style techno and acid. At 22 years has managed to present his music in prestigious labels such as *Labrynth*, *Armatura* or *Hardsignal*, and surely his upward career has only just begun...

Then we flew to the UK, featuring **Adverse Event**, an artist who takes us to the techno-90s with the legendary counter-drums that were the delight of most veterans.

Another product of the prolific Spanish quarry is **Hecrom**, Madrid based artist who has drawn attention for his handling of the atmospheres. His style is somewhat away from the dance floor, but it sure comes to mind of the techno-heads.

Finally, as usual, from **Drugstore** we present our own work. This time, a track closer to 4x4 than on previous occasions, most techno, tinted arabesques, in short, better to listen...

Relax, listen and enjoy. Welcome, this is **Cicuta Netlabel**.
