We present the latest EP of the 2011-2012 season for **Cicuta Netlabel**. A good dose of free and strong techno to enjoy at the beach or at the mountains. We promise to rest and recharge the batteries to re-cap in September, the month in which we celebrate our first anniversary.

We start our trip in Italy, flamboyant finalist of Euro soccer. There we discovered **Stefano Infusino**, talented producer who brings us a powerful track with a heavy bass, as a heat-wave falling on our ears... After going through labels like *Heaven To Hell*, *Gynoid* or *Shout Records*, arrives to Cicuta, not to be missed...

We continue with English **Ross Alexander**, an artist who even had a late start in point of production (about 2009) in just over 3 years has managed to walk his techno in important labels such as *Naked Lunch*, *Elektrax* or *UTCH*. Sure his dark and industrial techno not leaves you unsatisfied.

The next stop takes us to Birmingham, one of the central points of the techno scene, to meet **Jake Conlon**, an artist whom we met at the recommendation of a friend and left us open-mouthed. Do not fail to hear everything that makes this artist, quality techno...

The next artist to debut at Cicuta is the Irish Tony McMurray, better known as **Hoth System**. His techno is fresh, lively, different, an oasis in the desert of loops in which we live.

As usual we could not miss a new product from the Spanish quarry. Here we bring from Canillejas, a popular district of Madrid, possibly the artist who makes more tracks in a year. After an earlier stage in which published in labels like *Zimmer* or *Audioexit* under a different pseudonym, **Structural Form** reaches Cicuta to put a good dose of hard-techno in the ears of our listeners.

Finally, as usual, from **Drugstore** we present an own work. This time, a stronger track, closer to conventional techno. A gift for you to remember us until September...

Relax, listen and enjoy. Welcome, this is **Cicuta Netlabel**.
